Row

Row

The issuer believes that, at the time of its issuance and based on transparency data made publicly available by the issuer, these covered bonds would satisfy the eligibility criteria for Article 129(7) of the Capital Requirements Regulation (EU) 648/2012. It should be noted, however, that whether or not exposures in the form of covered bonds are eligible to preferential treatment under Regulation (EU) 648/2012 is ultimately a matter to be determined by a relevant investor institution and its relevant supervisory authority and the issuer does not accept any responsibility in this regard.

## C. Harmonised Transparency Template - Glossary

HTT 2021

The definitions below reflect the national specificities

Field Number	1. Glossary - Standard Harmonised Items	[Insert Definition Below]
HG.1.1	OC Calculation: Actual	Total value of cover pool subtracted nominal value of covered bonds
HG.1.2	OC Calculation: Legal minimum	Minimum legal required OC of RWA
HG.1.3	OC Calculation: Committed	ND2
	<b>Interest Rate Types</b>	<p><b>Index Loans:</b> These are loans where instalments and outstanding debt are adjusted with the development of an index which typically reflects trends in consumer prices. The loan type was introduced in Denmark in 1982. All Danish index loans have index semi-annual payment dates (January 1st and July 1st). Index loans are offered as cash loans. The maturity depends on the loan type. Especially the maturity for subsidized housing depends on the size of the future inflation rate.</p> <p><b>Fixed-rate loans:</b> The long-term – typically 30-year – fixed-rate, callable loan is considered the most traditional mortgage loan. With this loan, the borrower knows in advance the fixed repayments throughout the term of the loan. The long-term fixed-rate mortgage loan has a prepayment option which may be exercised in two ways, i.e. the borrowers may prepay their outstanding debt at a price of 100 (par) or the borrowers may purchase the underlying bonds in the financial markets and deliver them to the mortgage bank. This loan type is also offered with interest-only periods.</p> <p><b>Adjustable Rate Mortgages:</b> Adjustable-rate mortgages (ARMs) were introduced in 1996 and the main advantage of ARMs is that interest rates are generally lower than those of fixed-rate loans when raised. The interest rate is generally reset at a frequency of 1, 3, 5 or 10 years and the underlying bonds are replaced by new bonds. The yield of the new bonds determines the loan rate for the period until the next interest rate reset. The lower initial loan rate should therefore be weighed against the risk that it will increase during the loan term. An ARM may be prepaid at a price of 100 in connection with each interest rate reset. Alternatively, the borrower may prepay the loan by purchasing the bonds on market terms – as with all mortgage loans. This loan type is also offered with interest-only periods.</p> <p><b>Money market based loans:</b> The loan rate changes at generally three or six months. In addition, this loan type differs from ARMs as this interest rate depends on a reference rate, ie an interest rate determined in another market. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA (Copenhagen Interbank Tomorrow/Next Average ), an interest rate which is quoted daily by NASDAQ. This loan type is also offered with interest-only periods.</p> <p><b>Non Capped floaters:</b> These are loans where the rate changes at generally three or six months. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA (Copenhagen Interbank Tomorrow/Next Average ), an interest rate which is quoted daily by OMX NASDAQ. Capped floaters: It is possible to get a loan with a floating interest rate which cannot exceed a certain level (cap). In this way, the borrower hedges against major interest rate increases. If a loan has a cap of 6%, then the interest rate can never be higher than 6%. The loan rate will track CIBOR (or Euribor / Cita), as long as it does not exceed 6%. A floating-rate loan may be prepaid in two ways: either at an agreed price – typically 100 or 105 – or the borrower may buy the underlying bonds at market price.</p> <p><b>Other:</b> Any other loan types, which not comply with the above mentioned.</p>
HG.1.4	<b>Residual Life Buckets of Cover assets [i.e. how is the contractual and/or expected residual life defined? What assumptions eg, in terms of prepayments? etc.]</b>	Only contractual maturity is relevant and reported. Early repayments happens at borrower's discretion among other things depending on interest rate developments and cannot be anticipated by issuer.
HG.1.5	<b>Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under what conditions/circumstances? Etc.]</b>	Only contractual maturity is relevant and reported. Early repayments happens at borrower's discretion among other things depending on interest rate developments and cannot be anticipated by issuer.
HG.1.6	<b>LTVs: Definition</b>	LTV is reported continuously. The loans are distributed from the start LTV of the loan to the marginal LTV. This means that, if the loan is first rank, it is distributed proportionally by bracket size from 0 to the marginal
HG.1.7	<b>LTVs: Calculation of property/shipping value</b>	
HG.1.8	<b>LTVs: Applied property/shipping valuation techniques, including whether use of index, Automated Valuation Model (AVM) or on-site audits</b>	
HG.1.9	<b>LTVs: Frequency and time of last valuation</b>	Minimum once per year for commercial properties. Minimum once every third year for owner occupied.
HG.1.10	<b>Explain how mortgage types are defined whether for residential housing, multi-family housing, commercial real estate, etc. Same for shipping where relevant</b>	The Danish FSA sets guidelines for the grouping of property in categories. Property type is determined by its primary use.
HG.1.11	<b>Hedging Strategy (please explain how you address interest rate and currency risk)</b>	
HG.1.12	<b>Non-performing loans</b>	A loan is categorised as non-performing when a borrower neglects a payment failing to pay instalments and / or interests.

**Key Concepts**

X1 [Key Concepts Explanation](#)  
 X2 [Key Concept Explanation](#)  
 X3 [General explanation](#)

**Voluntary information**V1 [Regulatory requirement](#)

This transparency template is compliant with the requirements in CRR 129(7) and is used with ECBC labelled covered bonds issues by the three issuer categories below.

**Mandatory tables**

Please note that not all tables are applicable to each issuer type and that some information is optional. Information on applicability is given below and where relevant in connection with the tables in the template.

**Specialised mortgage banks**

Tables A, G1.1, G2-4, M1-M12, X1-3

**Ship finance institutes**

Tables A, G1.1, G2-4, S1-S13, X1-3

**Non-specialised bank CBs issuers**

Tables G1.1 (except total capital coverage), G2-4, B1-B1, X1-3

**Voluntary tables**

The issuer can insert voluntary tables that contain information in addition to what is contained in the Danish ECBC label template. It shall be possible to distinguish mandatory and voluntary tables.

The voluntary tables must be named V1....Vn, where n is the number of voluntary tables.

Voluntary tables must be marked with a colour different from the colour used for the mandatory tables in the Danish ECBC label template.
